EROSION CONTROL MEASURES, SUCH AS SILT FENCE AND SOD, MUST BE IN PLACE AND IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF THE STORMWATER POLLUTION PREVENTION PLAN

1. The Contractor shall be responsible for the disposal of all debris, material, and equipment in a permitted landfill and in accordance with applicable local and State laws. In addition the Contractor is responsible for all EPA and DEQ forms relative to asbestos. All raised curbing, structural supports, equipment pads, storage tanks, block or concrete foundation walls, retaining or support walls that extend or protrude below grade shall be removed at the time of demolition. Sewer laterals and water lines serving the demolished structure(s) shall extend vertically to finished grade and shall be capped with an approved plumbing device.
2. Upon completion of demolition OR REMOVAL, the Contractor shall provide any topsoil or clean fill dirt that may be needed to fill voids, depressions or holes that were created as a result of the demolition activities. The demolition site shall be compacted, graded and free of protrusions, demolition debris and abrupt edges. Existing grass, weeds and overgrowth shall be removed from the property prior to final restoration. Final restoration shall consist of seeding with a grass mixture and site stabilization using a vegetative cover. The final restored site shall be free of voids and pockets and in a condition that is suitable for mowing with a push type mower. The goal is to create the desired topography, soil profiles and drainage patterns to support restoration efforts and to assure that the existing storm water system can be maintained after completion of the project.
3. All streets and sidewalks shall be protected during demolition and swept clean upon completion of the project.
